HOW YOU START... SHAPES EVERYTHING

LESSONS DON'T START SLOWLY... THEY SPROUT INSTANTLY.

G.R.E.E.T.

- G** Gather: Be ready. Be visible. No drift.
- R** Recognise: Smile. Name. Notice.
- E** Engage: Hook them immediately.
- E** Expect: Set the tone early.
- T** Transition: Move straight into learning.

“Don’t wait for attention. Design for it.”

HOW TO USE THIS CARD

SMALL PROMPTS THAT SHIFT THE WHOLE LESSON.

Think of it like this...

- Starting a lesson is like hosting a party.
- If guests walk in and nothing’s happening... they hover, drift, check out.
- But if there’s enthusiasm, energy, and a welcome smile, they lean in immediately.
- Your first few minutes decide the energy of everything that follows.

Pause and ask yourself:

- What are students stepping into when they arrive?
- Would I feel welcomed... or unsure?
- Do students know what to do within 10 seconds?
- Is there energy... or waiting?
- Am I reacting to the class... or shaping it?

Gather students’ attention immediately on entry so they know exactly where to be and what to do.

Recognise each student with a smile so they feel seen from the moment they arrive.

Engage them quickly with something to think about, move with, or solve.

Expect clear class agreements early so behaviour and focus follow naturally.

Transition to the first activity without delay to build forward momentum.
