**SAY LESS...
GET MORE**

TEACHING ISN'T A PODCAST.
IF YOU'RE DOING ALL THE TALKING,
THEY'RE DOING ALL THE LISTENING.
AND LEARNING NEEDS DOING.

L.E.S.S.

- L** Limit: Keep instructions short and clear.
- E** Elicit: Ask questions, don't give answers.
- S** Start: Get students involved ASAP.
- S** Step Back: Let them think, talk & explore.

"The more you do for them, the less they learn for themselves."

HOW TO USE THIS CARD

SMALL PROMPTS THAT SHIFT THE WHOLE LESSON.

Think of it like this...

- Teaching is like going to the gym.
- If the trainer does all the lifting... you don't get stronger.
- If the trainer sets it up and steps back... you do the important work.
- And that's where the growth happens.

Pause and ask yourself:

- Who is doing most of the thinking in this lesson?
- Am I explaining... or are they figuring it out?
- Are students active... or just listening?
- How long am I talking before they begin?
- Where could I step back... and let them try first?

Limit your instructions so students can begin without overload. Focus on the first step, not the whole task.

Elicit thinking by asking questions instead of giving answers. Let students generate ideas before stepping in.

Start learning quickly with tasks that get students doing, not waiting. Action builds understanding.

Step back so students can think, talk, and explore. Give space before you step in.
